

Smart Solutions Consulting

Amricon's SMART Solutions Consulting division is able to handle a variety of business problems. Whatever your specific needs, our SMART Solutions Consulting team can develop totally bespoke solutions that meet those needs. In short, if you have a business problem, we'll utilize the very latest technology to help you solve it.

SMART Solutions Consulting – the process

Amricon has on board experienced teams and a defined consulting process. In the preparation stage, our consultants will meet with the client in order to define the project, its scope and objectives. Budgets are taken into account as well as the timescale. We then produce a project plan and specific offer for the solution design phase.

The solution design phase sees the analysis of the business processes and technical environment followed by solution specification and effort estimation.

The benefits of SMART Solutions Consulting

- Bespoke solutions for individuals, organizations and governments
- Saves you time, money and resources
- Easy to use and integrates seamlessly into your business environment
- Helps you achieve a significant return on investment from your business systems
